Our proposed system is an online food ordering system that enables ease for the customers. It overcomes the disadvantages of the traditional queueing system.

Our system is a medium to order online food hassle free from restaurants as well as mess service. This system improves the method of taking the order from customer.

The online food ordering system sets up a food menu online and customers can easily place the order as per their wish.

AIM

To the right of these are three buttons: a white one with a green notification badge containing the number '0', a blue one labeled 'CREATE NEW ACCOUNT', and a red one labeled 'LOGIN'. Below the header is a large, semi-transparent image of a smiling delivery person wearing a red cap and shirt, carrying a yellow insulated backpack. The background of the page has a yellow-to-white gradient. In the center, the text 'Hungry or thirsty?' is displayed in large, bold, dark blue letters. Below it is a black button with the white text 'Order right now!'. Underneath the button is the tagline 'Whenever, wherever. We'll bring food to you!!'.
